

Dear Hiring Manager,

I am excited to apply for the Software Engineer-1 position at Rippling. With a strong background in full-stack development and a passion for building scalable solutions, I am eager to contribute to Rippling's mission of streamlining HR, IT, and Finance into a unified system.

During my tenure at Deloai Private Limited, both as a Full Stack Software Developer Intern and later as a Software Developer, I developed and managed multiple web and mobile applications using React.js, React Native, Next.js, Flask, and Django. I played a key role in deploying SaaS applications, integrating robust backend services, and ensuring scalable frontend architectures for various clients. My experience in developing applications that seamlessly integrate different functionalities aligns well with Rippling's vision of automation and efficiency.

Beyond professional experience, my strong grasp of data structures, algorithms, and system design is evident through my active participation in competitive programming on platforms like LeetCode and CodeChef. My involvement in AI/ML projects, such as the award-winning AI/ML in School Management System at Smart India Hackathon 2022, showcases my ability to solve complex problems and innovate with technology.

Rippling's emphasis on building high-impact, scalable solutions resonates deeply with my expertise and career aspirations. I am eager to bring my problem-solving skills, software development experience, and enthusiasm for cutting-edge technology to your team.

I would welcome the opportunity to discuss how my background aligns with the needs of Rippling. Thank you for your time and consideration.

Best regards,

Jitendriyadeep [jitendriyailt@gmail.com](mailto:jitendriyailt@gmail.com)
